

AXIM® BIOTECHNOLOGIES, INC. PUBLISHES PRODUCT PIPELINE CHART FOR PHARMACEUTICAL CLINICAL TRIALS PROGRAM IN CANNABINOID R&D

Cannabinoid Innovator's Product Pipeline Highlights Timelines of Its Intellectual Property (IP) Protected Cannabinoid-Based Products from Pre-Clinical to NDA for Multiple Indications

NEW YORK – Nov 3, 2016 – AXIM® Biotechnologies, Inc. (AXIM Biotech) (OTC: AXIM), a world leader in cannabinoid research and development, today announced that it has published a [product pipeline chart](#) on its website that highlights the timelines from pre-clinical to a new drug application (NDA) for its numerous intellectual property-protected cannabinoid-based products.

The Company's [product pipeline chart](#) shows what stage of clinical trials each drug of AXIM Biotech is in, the indication the drug is intended to treat and the expected date to receive an NDA from the U.S. Food and Drug Administration (FDA) and/ or European Medicines Agency (EMA). The chart also shows the anticipated market introduction date of the Company's various functional food and nutraceutical products.

"We wanted to provide our potential patients and investors with a clear snapshot of the numerous cannabinoid-based therapeutic products that we currently have undergoing clinical trials and when these products are anticipated to be on the market and approved by the FDA and EMA," said AXIM Biotechnologies, Inc.'s Chief Executive Officer George E. Anastassov, MD, DDS, MBA. "Our company is continuing to develop cannabinoid-based drugs to find answers for health conditions with currently no known sustainable answers."

View the product pipeline chart [here](#).

An AXIM Biotech breakthrough invention on pace to be fully registered by the EMA and FDA by the end of 2018 is the world's first patented cannabinoid controlled-release chewing gum: MedChew Rx™. Recently featured by Reuters global news agency, MedChew Rx™ will change the way that medicine is delivered to patients worldwide. Directly compared to a sublingually delivered cannabis-based product currently on the market for multiple sclerosis (MS) in the Reuters article, the potential economic impact for MedChew Rx™ is estimated at \$4.8 billion USD – for spasticity and pain associated with MS.

AXIM's pipeline of intellectual property (IP) protected cannabinoid-based products include:

- MedChew Rx™ - THC/CBD cannabinoid controlled-release functional chewing gum to address pain and muscle spasticity in multiple sclerosis (MS) patients as well as numerous indication extensions based on the proprietary delivery platform
- RENECANN™ - the world's first cannabigerol (CBG)-based skincare product line

- ORAXIMAX™ - the world's first CBG-based oral care product line
- Suppocann™ - a suppository cannabinoid-release product for GI conditions such as IBD, IBS and Crohn's disease
- Ophthocann™ and Cannbleph™ - cannabinoid-based products for reduction of intraocular pressure and for relief of conjunctivitis
