

## **AXIM® BIOTECHNOLOGIES, INC. DONATES FLAGSHIP CANCHEW GUM TO U.S. PAIN FOUNDATION TO HELP CHRONIC PAIN SUFFERERS**

**NEW YORK – Nov. 22, 2016 –** [AXIM® Biotechnologies, Inc. \(AXIM® Biotech\)](#) (OTC: AXIM), a world leader in cannabinoid research and development, today announced that it has donated 3,200 pieces of its hemp-derived CBD functional chewing gum [CanChew®](#) to the U.S. Pain Foundation to support the organization’s dedication in empowering caregivers and those who suffer from chronic pain.

The U.S. Pain Foundation is a non-profit organization that educates, connects, informs and empowers those living with chronic pain, while also advocating on behalf of the pain community. While Axim Biotech makes no claims that its nutraceutical product [CanChew®](#) gum can treat any specific condition, the positive effects of cannabidiol (CBD) for chronic pain sufferers is well established by science today.

“We are honored to support an organization that dedicates itself to helping those with chronic pain, a national epidemic that affects nearly 100 million Americans,” said George E. Anastassov, MD, DDS, MBA and Chief Executive Officer of AXIM® Biotechnologies. “Like the U.S. Pain Foundation, AXIM also believes in making an impact on individuals’ well-being, which we do through products that treat conditions for which there is currently no effective remedy.”

CanChew® is the world’s first patented controlled-release cannabinoid chewing gum containing 50 mg of hemp oil and 10 mg of cannabidiol (CBD). [AXIM® Biotech](#) holds the exclusive rights to market and distribute CanChew® Gum globally. [CanChew®](#) is a hemp CBD chewing gum with a unique oral mucosal absorbance delivery system. Features listed on the [CanChew®](#) website include:

- Non-habit forming
- No prescription needed
- Available in all 50 states
- Great-tasting mint gum has no artificial sweeteners or preservatives
- Non-GMO, gluten free, vegan and kosher

AXIM’s pipeline of intellectual property (IP) protected cannabinoid-based products include:

- MedChew Rx™ - THC/CBD cannabinoid controlled-release functional chewing gum to address pain and muscle spasticity in multiple sclerosis (MS) patients as well as numerous indication extensions based on the proprietary delivery platform
- RENECANN™ - the world’s first cannabigerol (CBG)-based skincare product line
- ORAXIMAX™ - the world’s first CBG-based oral care product line
- Suppocann™ - a suppository cannabinoid-release product for GI conditions such as IBD, IBS and Crohn’s disease
- Ophthocann™ and Cannbleph™ - cannabinoid-based products for reduction of

intraocular pressure and for relief of conjunctivitis
